# CLASS PRIOR AUTHORIZATION CRITERIA FOR PATIENT'S WITH INTELLECTUAL AND DEVELOPMENTAL DISABILITIES (I/DD):

Anti-anxiety agents prescribed for disorders related to Intellectual and Developmental Disabilities will be approved if ONE of the following is met:

- Prescribed bay a Gold Card prescriber; OR
- Mental health assessment applicable to behavioral symptoms for which the medication is being prescribed; AND
  - Underlying physical condition such as pain, discomfort, and environmental issues have been evaluated, treated, and behavioral symptoms persist; AND
  - Non-pharmacological interventions have been tried and behavioral symptoms persist (e.g., behavior plan, crisis intervention, and stabilization strategies or training) and training and support have been provided to family or other caregivers
- Short-term therapy (less than 90 days) has been prescribed; AND
  - o Behavioral symptoms are significant enough to place the person at potential risk or needing higher level of care or loss of community placement; OR
    - Continuation of existing therapy to address serious and ongoing behavioral symptoms while other prior authorization criteria are met; AND
  - o Efficacy and potential side effects to be monitored; AND
  - o Need for requested medication will be evaluated once other non-pharmacological interventions have been tried

# Note the following:

- Drug specific step therapy, NP criteria and Brand Medically Necessary Criteria will still apply to this patient population.
- The I/DD Worksheet can be found at: I/DD Prior Authorization Form

Antidepressants: MAOIs

# CLASS PRIOR AUTHORIZATION CRITERIA FOR PATIENT'S WITH INTELLECTUAL AND DEVELOPMENTAL DISABILITIES (I/DD):

Antidepressants prescribed for disorders related to Intellectual and Developmental Disabilities will be approved if ONE of the following is met:

- Prescribed by a Gold Card prescriber; OR
- Mental health assessment applicable to behavioral symptoms for which the medication is being prescribed; AND
  - Underlying physical condition such as pain, discomfort, and environmental issues have been evaluated, treated, and behavioral symptoms persist; AND
  - Non-pharmacological interventions have been tried and behavioral symptoms persist (e.g., behavior plan, crisis intervention, and stabilization strategies or training) and training and support have been provided to family or other caregivers; OR
- Short-term therapy (less than 90 days) has been prescribed; AND
  - o Behavioral symptoms are significant enough to place the person at potential risk or needing higher level of care or loss of community placement; **OR** 
    - Continuation of existing therapy to address serious and ongoing behavioral symptoms while other prior authorization criteria are met; AND
  - o Efficacy and potential side effects to be monitored; AND
  - o Need for requested medication will be evaluated once other non-pharmacological interventions have been tried

- Drug specific step therapy, NP criteria and Brand Medically Necessary Criteria will still apply to this patient population.

# CLASS PRIOR AUTHORIZATION CRITERIA FOR PATIENTS WITH INTELLECTUAL AND DEVELOPMENTAL DISABILITIES (I/DD):

Antidepressants prescribed for disorders related to Intellectual and Developmental Disabilities will be approved if ONE of the following is met:

• Prescribed by a Gold Card prescriber; OR

NP

NP

- Mental health assessment applicable to behavioral symptoms for which the medication is being prescribed; AND
  - Underlying physical condition such as pain, discomfort, and environmental issues have been evaluated, treated, and behavioral symptoms persist; AND
  - Non-pharmacological interventions have been tried and behavioral symptoms persist (e.g., behavior plan, crisis intervention, and stabilization strategies or training) and training and support have been provided to family or other caregivers; OR
- Short-term therapy (less than 90 days) has been prescribed; AND

tabs)

- Behavioral symptoms are significant enough to place the person at potential risk or needing higher level of care or loss of community placement; OR
  - Continuation of existing therapy to address serious and ongoing behavioral symptoms while other prior authorization criteria are met; AND
- Efficacy and potential side effects to be monitored; AND
- Need for requested medication will be evaluated once other non-pharmacological interventions have been tried

### Note the following:

# CLASS PRIOR AUTHORIZATION CRITERIA FOR PATIENTS WITH INTELLECTUAL AND DEVELOPMENTAL DISABILITIES (I/DD):

Antipsychotics prescribed for disorders related to Intellectual and Developmental Disabilities will be approved if ONE of the following is met:

- Prescribed by a Gold Card prescriber; OR
- Mental health assessment applicable to behavioral symptoms for which the medication is being prescribed; AND
  - Underlying physical condition such as pain, discomfort, and environmental issues have been evaluated, treated, and behavioral symptoms persist; AND
  - Non-pharmacological interventions have been tried and behavioral symptoms persist (e.g., behavior plan, crisis intervention, and stabilization strategies or training) and training and support have been provided to family or other caregivers; OR
- Short-term therapy (less than 90 days) has been prescribed; AND
  - o Behavioral symptoms are significant enough to place the person at potential risk or needing higher level of care or loss of community placement; OR
    - Continuation of existing therapy to address serious and ongoing behavioral symptoms while other prior authorization criteria are met; AND
  - o Efficacy and potential side effects to be monitored; AND
  - Need for requested medication will be evaluated once other non-pharmacological interventions have been tried

- Duration of short-term therapy is 90 days for antipsychotics
- Drug specific step therapy, NP criteria and Brand Medically Necessary Criteria will still apply to this patient population.
- The I/DD Worksheet can be found at: I/DD Prior Authorization Form

## **ONCOLOGY AGENTS** Approval of NP agents requires trial and failure, contraindication, or intolerance of 2 preferred agents, unless otherwise indicated. PDL Medication **Prior Authorization Criteria Qty. Limits PA Form** Initial Criteria (6-month duration): Patient meets ONE of the following disease specific criteria: Diagnosis of recurrent, advanced, or metastatic Non-Small Cell Lung Cancer (NSCLC); AND Disease is ROS1 positive as detected by an FDA-approved test NTRK Gene Fusion-Positive Solid Tumor; AND Presence of a neurotrophic tyrosine receptor kinase (NTRK) gene fusion as detected by an FDA-approved test, without a known acquired resistance mutation; AND Disease is metastatic or where surgical resection is likely to result in severe morbidity; AND Disease has progressed following treatment or there is no satisfactory alternative treatment; AND Prescribed by, or in consultation with, an oncologist; AND Patient does not have a history of prolonged QTc interval (e.g., QTc interval > 450 milliseconds); AND Patient will not use therapy in combination with drugs which prolong QT-interval; AND Patient will not use therapy with other NTRK-inhibitor therapy or ROS1-directed therapy; AND Patient does not have signs and symptoms of hyperuricemia as evidenced by a baseline serum; AND Patient will avoid concomitant use with moderate or strong CYP3A inducers or inhibitors; AND Provider attests to perform ALL the following: General PA 100 mg: 5/day; Rozlytrek® capsules Assess left ventricular ejection fraction (LVEF) prior to initiation of Rozlytrek in patients with symptoms or known risk factors 200 mg: 3/day Form for CHF Monitor liver tests, including ALT and AST, every 2 weeks during the first month of the patient's treatment, then monthly thereafter, and as clinically indicated Assess serum uric acid levels prior to initiation and periodically during treatment with Rozlytrek Assess QT interval and electrolytes at baseline and periodically during treatment patients who have or who are at risk for QTc interval prolongation Advise females of reproductive potential of the potential risk to a fetus and use of effective contraception during treatment and for 5 weeks following the final dose Advise males with female partners of reproductive potential to use effective contraception during treatment and for 3 months after the final dose Renewal Criteria (6-month duration): Patient must continue to meet the initial criteria; AND Documented disease response with treatment, as defined by stabilization of disease or decrease in size of tumor or tumor spread; AND There is absence of unacceptable toxicity from the drug (e.g., congestive heart failure, hepatotoxicity, central nervous system effects, hyperuricemia, QT-interval prolongation, visual disturbances) See Rozlytrek capsules prior authorization criteria; AND **General PA** Rozlytrek® pack 600mg/day Clinically valid reason why Rozlytrek capsules cannot be used Form

		ONCOLOGY AGENTS		
Medication	PDL	Approval of NP agents requires trial and failure, contraindication, or intolerance of 2 preferred agents, unless otherwise indicated.  Prior Authorization Criteria	Qty. Limits	PA Form
Vitrakvi®	NP	Initial Criteria:  Patient has a solid tumor (e.g., soft tissue sarcoma, salivary gland, infantile fibrosarcoma, thyroid, lung, or gastrointestinal stromal tumors); AND  Prescribed by, or in consultation with, an oncologist; AND  Patient meets ALL the following:  Presence of a neurotrophic tyrosine receptor kinase (NTRK) gene fusion without a known acquired resistance mutation  Disease is metastatic or surgical resection is likely to result in severe morbidity  Disease has progressed following treatment or there is no satisfactory alternative treatment; AND  Provider attests to ALL the following:  Monitor liver tests including ALT and AST every 2 weeks during the first month of treatment, then monthly thereafter and as clinically indicated  Advise females with reproductive potential and males with female partners of reproductive potential to use effective contraception during treatment and for 1 week after the final dose  Renewal Criteria:  Patient continues to meet initial criteria; AND  Patient does not have unacceptable toxicity such as severe neurotoxicity, hepatotoxicity; (adverse effects resolve following dose recommendations/no permanent discontinuation required)	25 mg: 3/day; 100 mg: 2/day; 20 mg/mL: 10 mL/day	General PA Form
	ı	Hormonal Agents: Aromatase Inhibitors		
anastrozole	Р	For male patients, diagnosis of breast cancer     For female patients, no PA required		General PA Form
		Hormonal Agents: Anti-Androgens Second Generation		
Akeega®	NP	<ul> <li>Initial Criteria (6-month duration)</li> <li>Diagnosis of metastatic castration-resistant prostate cancer (mCRPC); AND</li> <li>Patient has a deleterious or suspected deleterious BRCA-mutated (BRCAm) germline confirmed by an FDA approved test; AND</li> <li>Will be taken in combination with prednisone; AND</li> <li>ONE of the following:         <ul> <li>Medication will used in combination with androgen deprivation therapy (ADT) (e.g., leuprolide, goserelin, triptorelin, degarelix, relugolix)</li> <li>Patient has had a bilateral orchiectomy</li> </ul> </li> <li>Renewal Criteria</li> <li>Patient continues to meet the initial criteria; AND</li> <li>Tumor response with stabilization of disease or decrease in size of tumor or tumor spread; AND</li> <li>Absence of unacceptable toxicity from the drug (e.g., hepatotoxicity, fractures, hypertension)</li> </ul>	2/day	General PA Form

		ONCOLOGY AGENTS  Approval of NP agents requires trial and failure, contraindication, or intolerance of 2 preferred agents, unless otherwise indicated.		
Medication	PDL	Prior Authorization Criteria	Qty. Limits	PA Form
Erleada®	NP	Initial Criteria (6-month duration):  Patient has diagnosis of ONE of the following:  Non-metastatic castration-resistant disease prostate cancer (nmCRPC)  Metastatic castration-sensitive disease prostate cancer (mCSPC); AND  ONE of the following:  Medication will used in combination with androgen deprivation therapy (ADT) (e.g., leuprolide, goserelin, triptorelin, degarelix, relugolix)  Patient has had a bilateral orchiectomy  Renewal Criteria:  Patient continues to meet the initial criteria; AND  Tumor response with stabilization of disease or decrease in size of tumor or tumor spread; AND  Absence of unacceptable toxicity from the drug. Examples of unacceptable toxicity include seizures, excessive falls and/or fractures and any other Grade 3 or above side effects that are intolerable to patient, etc.	4/day	General PA Form
Nubeqa®	NP	Initial Criteria (6-month duration):  Diagnosis of ONE of the following:  Non-metastatic castration-resistant prostate cancer (nmCRPC); AND  Metastatic hormone-sensitive prostate cancer (mHSPC); AND  ONE of the following:  Medication will used in combination with androgen deprivation therapy (ADT) (e.g., leuprolide, goserelin, triptorelin, degarelix, relugolix); OR  Patient has had a bilateral orchiectomy  Renewal Criteria:  Patient continues to meet the initial criteria; AND  Tumor response with stabilization of disease or decrease in size of tumor or tumor spread; AND  Absence of unacceptable toxicity from the drug. Examples of unacceptable toxicity include elevated hepatic enzymes, hyperbilirubinemia, neutropenia, or any other Grade 3 or above side effects that are intolerable to patient, etc.	4/day	General PA Form
Xtandi® tablets	NP	Documented allergy or contraindication to an inactive ingredient in the capsules that is NOT in the tablets		General PA Form
Yonsa®	NP	Initial Criteria (6-month duration):  Patient has metastatic castration-resistant prostate cancer (mCRPC); AND  Will be taken in combination with methylprednisolone; AND  ONE of the following:  Medication will used in combination with androgen deprivation therapy (ADT) (e.g., leuprolide, goserelin, triptorelin, degarelix, relugolix)  Patient has a bilateral orchiectomy; AND  Renewal Criteria:  Patient continues to meet the initial criteria; AND  Tumor response with stabilization of disease or decrease in size of tumor or tumor spread  Absence of unacceptable toxicity from the drug (e.g., elevated hepatic enzymes, hypokalemia, fluid retention, hypertension)		General PA Form

	ONCOLOGY AGENTS  Approval of NP agents requires trial and failure, contraindication, or intolerance of 2 preferred agents, unless otherwise indicated.					
Medication	PDL	Prior Authorization Criteria	Qty. Limits	PA Form		
		Hormonal Agents: GnRH Agonists & LNRH Analogs				
Eligard®	Р	Diagnosis of prostate cancer in male patient		General PA Form		
leuprolide	Р	<ul> <li>Leuprolide will be approved for patients meeting ONE of the following criteria:</li> <li>Diagnosis of prostate cancer in male patient</li> <li>Diagnosis of central precocious puberty in children (onset of secondary sexual development before 8 [girls] or 9 years of age [boys])</li> </ul>		General PA Form		
Lupron Depot®	NP	<ul> <li>Will be approved for self-administering patients with ONE of the following:         <ul> <li>Diagnosis of prostate cancer in male patient</li> <li>Diagnosis of endometriosis in female patient</li> <li>Diagnosis of uterine leiomyomas in female patient</li> <li>Diagnosis of recurrent ovarian carcinoma</li> </ul> </li> </ul>		General PA Form		
Orgovyx®	NP	<ul> <li>Diagnosis of advanced prostate cancer in male patient; AND</li> <li>Male patients with female partners of reproductive potential have been advised to use effective contraception during treatment and for two weeks after the last dose; AND</li> <li>Patient will not take requested medication with ANY of the following:         <ul> <li>P-GP Inhibitors</li> <li>Strong CYP3A Inducers</li> <li>cisapride</li> <li>pimozide</li> <li>thioridazine</li> </ul> </li> </ul>	30/month (32 tablets for initial month of therapy)	General PA Form		
	•	Hormonal Agents: SERM/SERD		1		
Orserdu®	NP	Initial Criteria (6-month duration):  Patient has hormone receptor-positive, HER2-negative advanced breast; AND  Patient has received at least one endocrine based regimen; AND  Patient has ESR1 mutation detected by FDA-approved test; AND  If female, patient is postmenopausal; AND  Orserdu will be used as monotherapy; AND  Prescribed by, or in consultation with, an oncologist; AND  Patient must not be pregnant or breastfeeding; AND  Females of reproductive potential and males undergoing treatment with female partners of reproductive age should be advised to use effective contraception during treatment and for 1 week after the final dose  Renewal Criteria:  Patient continues to meet initial criteria; AND  Patient has positive disease response defined as disease stabilization or decrease in size of tumor or tumor spread; AND  Patient does not have unacceptable toxicity (e.g., dyslipidemia, musculoskeletal pain)	345 mg: 1/day 86 mg: 3/day	General PA Form		

		ONCOLOGY AGENTS  Approval of NP agents requires trial and failure, contraindication, or intolerance of 2 preferred agents, unless otherwise indicated.		
Medication	PDL	Prior Authorization Criteria	Qty. Limits	PA Form
	•	Multikinase Inhibitors: Renal and Thyroid Cancers		
Fotivda®	NP	Initial Criteria (6-month duration):  Patient has diagnosis of relapsed or refractory advanced renal cell carcinoma (RCC); AND  Patient has had two or more prior systemic therapies [two kinase inhibitors (KIs), a KI plus an immune checkpoint inhibitor, or a KI plus other systemic agents]; AND  Prescriber attests to ALL the following:  Patient will be closely monitored due to increased risk of Arterial and venous Thromboembolic Events, Hemorrhagic Events, Proteinuria, and Thyroid Dysfunction  Fotivda will be withheld for at least 24 days before elective surgery and will not administer for at least 2 weeks following major surgery and adequate wound healing  Patient's baseline liver function tests will be assessed  Female and male patients of reproductive potential have been advised to use effective contraception during treatment and for one month after the last dose  Agent will not be co-administered with strong CYP3A inducers  Patient does not have a history of allergic reactions to tartrazine (only applies to requests for Fotivda 0.89 mg)  Female patients are not pregnant or breastfeeding; AND  Will not use in patients with any of the following:  Strong CYP3A inducers  History of allergic reactions to tartrazine  Renewal Criteria:  Patient continues to meet initial criteria; AND  Prescriber attests to positive response to therapy indicated by tumor response with stabilization of disease OR decrease in size of tumor or tumor spread; AND  Patient has absence of unacceptable toxicity from the drug (e.g., uncontrolled hypertension, onset of cardiac failure, arterial and venous Thromboembolic Events, hemorrhagic events, proteinuria, thyroid dysfunction, onset of Reversible Posterior Leukoencephalopathy Syndrome (RPLS), or increased LFT's)	21/28 days	General PA Form
lenalidomide	NP	Clinically valid reason why Revlimid cannot be used		General PA

ONCOLOGY AGENTS  Approval of NP agents requires trial and failure, contraindication, or intolerance of 2 preferred agents, unless otherwise indicated.					
Medication	PDL	Prior Authorization Criteria	Qty. Limits	PA Form	
Xpovio®	NP	Initial Criteria (6-month duration):  One of the following: Diagnosis of multiple myeloma; AND Patient has received at least one prior therapy Diagnosis of diffuse large B-cell lymphoma (DLBCL), not otherwise specified, including DLBCL arising from follicular lymphoma; AND Patient has relapsed or refractory disease; AND Patient has received at least 2 lines of systemic therapy; AND Prescribed by, or in consultation with, an oncologist  Renewal Criteria: Patient continues to meet initial criteria; AND Prescriber attests that the patient has experienced lack of disease progression, and/or improvement in symptoms; AND Patient has absence of unacceptable toxicity from the drug (e.g., thrombocytopenia, neutropenia, gastrointestinal toxicity, hyponatremia, neurological toxicity)	4 packs/month	General PA Form	
		Myelofibrosis			
Jakafi®	Р		2/day	General PA Form	
Besremi®	NP	<ul> <li>Diagnosis of polycythemia vera; AND</li> <li>Prescribed by, or in consultation with, an oncologist or hematologist; AND</li> <li>Patient does not have ANY of the following:         <ul> <li>Severe, acute, or unstable cardiovascular disease</li> <li>Existence of, or history of severe psychiatric disorders, particularly severe depression, suicidal ideation, or suicide attempt</li> <li>Hypersensitivity to interferon or to any component of BESREMI</li> <li>Hepatic impairment (Child-Pugh B or C)</li> <li>History or presence of active serious or untreated autoimmune disease; AND</li> </ul> </li> <li>Patient is not an immunosuppressed transplant recipient; AND</li> <li>For women of childbearing age, provider has confirmed that the patient is not pregnant prior to receiving treatment; AND</li> <li>Patients of reproductive potential will be counseled to use effective contraception during treatment and for at least 8 weeks after the final dose</li> </ul>		General PA Form	
Inrebic <sup>®</sup>	NP	Initial Criteria:  Patient has a diagnosis of primary or secondary (post-polycythemia vera or post-essential thrombocythemia) myelofibrosis; AND  Patient is considered intermediate-2 risk or high-risk; AND  Patient's platelet count ≥ 50 x 109/L; AND  Provider attests patient is not thiamine deficient (vitamin B1) and will monitor thiamine level during treatment Renewal Criteria:  Patient has positive clinical response to therapy (e.g., reduction in symptoms, decreased spleen size); AND  Absence of unacceptable toxicity (e.g., encephalopathy, anemia, thrombocytopenia, hepatoxicity, major adverse cardiovascular events, thrombosis, and malignancies); AND  Prescriber agrees to continue monitoring thiamine (vitamin B1) levels	4/day	General PA Form	

	ONCOLOGY AGENTS  Approval of NP agents requires trial and failure, contraindication, or intolerance of 2 preferred agents, unless otherwise indicated.					
Medication	PDL	Prior Authorization Criteria	Qty. Limits	PA Form		
Ojjaara®	NP	<ul> <li>Initial Criteria:         <ul> <li>Patient has a diagnosis of primary or secondary (post-polycythemia vera or post-essential thrombocythemia) myelofibrosis; AND</li> <li>Patient is considered intermediate-1, intermediate-2, or high-risk; AND</li> <li>Patient is anemic (e.g., hemoglobin (Hb) &lt; 10 g/dL and/or hematocrit (Hct) &lt; 30%)</li> </ul> </li> <li>Renewal Criteria:         <ul> <li>Patient has positive clinical response to therapy (e.g., reduction in symptoms, decreased spleen size, decreased number of transfusion); AND</li> </ul> </li> <li>Absence of unacceptable toxicity (e.g., thrombocytopenia, neutropenia, hepatotoxicity, major adverse cardiovascular events, thrombosis, and malignancies)</li> </ul>	1/day	General PA Form		
Vonjo®	NP	<ul> <li>Initial Criteria</li> <li>Patient has a diagnosis of primary or secondary (post-polycythemia vera or post-essential thrombocythemia) myelofibrosis; AND</li> <li>Patient is considered intermediate risk or high-risk; AND</li> <li>Platelet count is below 50 x 10<sup>9</sup>/L</li> <li>Renewal Criteria:</li> <li>Patient has positive clinical response to therapy (e.g., reduction in symptoms, decreased spleen size, decreased number of transfusions); AND</li> <li>Absence of unacceptable toxicity (e.g., thrombocytopenia, major adverse cardiovascular events, thrombosis, malignancies)</li> </ul>	4/day	General PA Form		
		PI3K Inhibitors		•		
Itovebi®	NP	Initial Criteria  Patient has hormone receptor-positive, HER2-negative locally advanced or metastatic breast cancer; AND  Patient has a PIK3CA mutation as detected by an FDA-approved test; AND  Patient has experienced disease recurrence on or after completing adjuvant endocrine therapy; AND  Agent is being given in combination with Ibrance and fulvestrant; AND  Agent is prescribed by, or in consultation with, an oncologist  Renewal criteria  Patient continues to meet initial criteria; AND  Patient has clinical response defined as disease stabilization or decrease in size or spread of tumor; AND  Patient does not have unacceptable toxicity (e.g., hyperglycemia, diarrhea, stomatitis)	3mg: 2/day 9mg: 1/day	General PA Form		

		ONCOLOGY AGENTS		
		Approval of NP agents requires trial and failure, contraindication, or intolerance of 2 preferred agents, unless otherwise indicated.		
Medication	PDL	Prior Authorization Criteria	Qty. Limits	PA Form
Piqray®	NP	Initial Criteria:  Patient has hormone receptor-positive, HER2-negative advanced breast cancer; AND  Agent is prescribed by, or in consultation with, an oncologist; AND  Patient has experienced disease progression on after an endocrine based regimen for advanced disease OR has relapsed disease within 12 months after completion of adjuvant endocrine therapy; AND  Patient has a PIK3CA-mutation as detected by an FDA-approved test; AND  Piqray® will be given in combination with fulvestrant; AND  Renewal Criteria:  Patient continues to meet initial criteria; AND  Patient has tumor response with stabilization of disease or decrease in the size of tumor or tumor spread; AND  Patient does not have unacceptable toxicity such as severe cutaneous reaction or pneumonitis		General PA Form
Truqap®	NP	<ul> <li>Initial Criteria</li> <li>Patient has hormone receptor-positive, HER2-negative locally advanced or metastatic breast cancer; AND</li> <li>Patient has one or more PIK3CA/AKT1/PTEN-alterations as detected by an FDA-approved test; AND</li> <li>Patient has experienced disease progression on after an endocrine based regimen for advanced disease OR has relapsed disease within 12 months after completion of adjuvant endocrine therapy; AND</li> <li>Agent is being given in combination with fulvestrant; AND</li> <li>Agent is prescribed by, or in consultation with, an oncologist</li> <li>Renewal criteria</li> <li>Patient continues to meet initial criteria; AND</li> <li>Patient has clinical response defined as disease stabilization or decrease in size of tumor or tumor spread; AND</li> <li>Patient does not have unacceptable toxicity (e.g., hyperglycemia, diarrhea, cutaneous adverse reactions)</li> </ul>	64/28 days	General PA Form
		Rare/Miscellaneous Oncology Conditions		
Ayvakit <sup>®</sup>	NP	Initial Criteria:  Diagnosis of ONE of the following:  Unresectable or metastatic gastrointestinal stromal tumors (GIST) with platelet-derived growth factor-alpha (PDGFRA) exon 18 mutation, including PDGFRA D842V mutations  Indolent systemic mastocytosis (ISM)  Advanced systemic mastocytosis (AdvSM) Note: Includes aggressive systemic mastocytosis (ASM), systemic mastocytosis with an associated hematological neoplasm (SM-AHN), and mast cell leukemia (MCL); AND  Prescribed by, or in consultation with, an oncologist; AND  Renewal Criteria:  Patient continues to meet initial criteria; AND  Patient does not show evidence of progressive disease or unacceptable toxicity (e.g., intracranial hemorrhage, cognitive dysfunction)	1/day	General PA Form

	ONCOLOGY AGENTS  Approval of NP agents requires trial and failure, contraindication, or intolerance of 2 preferred agents, unless otherwise indicated.					
Medication	PDL	Prior Authorization Criteria	Qty. Limits	PA Form		
lwilfin®	NP	Initial Criteria:  Diagnosis of high-risk neuroblastoma (HRNB); AND  Patient had a partial response to prior multiagent, multimodality therapy; AND  Patient has received anti-GD2 immunotherapy (e.g., dinutuximab); AND  Prescribed by, or in consultation with, an oncologist  Renewal Criteria:  Patient continues to meet initial criteria; AND  Patient does not show evidence of progressive disease or unacceptable toxicity (e.g., hepatotoxicity, hearing loss)		General PA Form		
Ogsiveo®	NP	<ul> <li>Initial Criteria:         <ul> <li>Diagnosis of progressing desmoid tumor (also known as aggressive fibromatosis); AND</li> <li>Prescriber has reviewed and evaluated appropriate treatment options and attests that the patient requires systemic therapy; AND</li> <li>Prescribed by, or in consultation with, an oncology, hematology, or gastroenterology specialist</li> </ul> </li> <li>Renewal Criteria:         <ul> <li>Patient demonstrates disease stabilization or clinical response to therapy (e.g., decrease tumor size, decreased pain, improved physical function, increased quality of life)</li> </ul> </li> </ul>	6/day	General PA Form		
Qinlock®	NP	<ul> <li>Initial Criteria:         <ul> <li>Diagnosis of unresectable, locally advanced, or metastatic gastrointestinal stromal tumor (GIST); AND</li> <li>Prescribed by, or in consultation with, an oncologist; AND</li> <li>Patient has been previously treated with at least THREE kinase systemic therapies (e.g., imatinib, avapritinib, sunitinib, regorafenib)</li> </ul> </li> <li>Renewal Criteria:         <ul> <li>Patient continues to meet initial criteria; AND</li> <li>Patient does not show evidence of progressive disease and unacceptable toxicity (e.g., uncontrolled hypertension, cardiac dysfunction)</li> </ul> </li> </ul>	3/day	General PA Form		
Rezurock®	NP	<ul> <li>Initial Criteria (6-month duration):</li> <li>Patient has diagnosis of Chronic Graft-Versus-Host Disease; AND</li> <li>Patient is 12 years of age or older; AND</li> <li>Patient has a history of allogenic hematopoietic cell transplant (HCT); AND</li> <li>Agent is prescribed by, or in consultation with, an oncologist, hematologist, or bone marrow transplant specialist; AND</li> <li>Patient has had a previous failure of at least one systemic corticosteroid therapy (i.e., methylprednisolone, prednisone, etc.); AND</li> <li>Patient has had a previous failure of at least one non-steroidal systemic immunosuppressant therapy (e.g., abatacept, alemtuzumab, calcineurin inhibitor, etanercept, hydroxychloroquine, ibrutinib, imatinib, interleukin-2, low-dose methotrexate, mTOR inhibitor, mycophenolate mofetil, pentostatin, rituximab, ruxolitinib, etc.); AND</li> <li>Prescriber attests, if applicable, that patient will be advised that effective contraception should be used during treatment and for at least one week after last dose</li> <li>Renewal Criteria:</li> <li>Patient continues to meet the initial criteria; AND</li> <li>Patient is responding positively to treatment</li> </ul>	1/day	General PA Form		

	ONCOLOGY AGENTS						
Medication	PDL	Approval of NP agents requires trial and failure, contraindication, or intolerance of 2 preferred agents, unless otherwise indicated.  Prior Authorization Criteria	Qty. Limits	PA Form			
Tazverik®	NP	Initial Criteria:  Diagnosis of ONE of the following:  Metastatic or locally advanced epithelioid sarcoma; AND  Patient not eligible for complete resection  Relapsed or refractory follicular lymphoma; AND  Tumor is positive for an EZH2 mutation as detected by an FDA approved test; AND  Patient has received ≥ 2 prior systemic therapies OR has not had satisfactory alternative treatment option; AND  Prescribed by, or in consultation with, an oncologist; AND  Renewal Criteria:  Patient continues to meet initial criteria; AND  Patient does not show evidence of progressive disease and unacceptable toxicity (e.g. secondary malignancy)	8/day	General PA Form			
Turalio®	NP	<ul> <li>Initial Criteria:         <ul> <li>Diagnosis of symptomatic tenosynovial giant cell tumor (TGCT); AND</li> <li>Patient has severe morbidity or functional limitations (e.g., worst stiffness numeric rating scale [NRS] of ≥ 4); AND</li> <li>Patient is not a candidate for surgical resection associated with potential worsening, functional limitation, or severe morbidity; AND</li> <li>Prescribed by, or in consultation with, a hematologist or oncologist; AND</li> <li>Prescriber is enrolled in the Turalio REMS Program</li> </ul> </li> <li>Renewal Criteria:         <ul> <li>Patient continues to meet initial criteria; AND</li> <li>Patient does not show evidence of progressive disease and unacceptable toxicity (e.g., hepatotoxicity)</li> </ul> </li> </ul>	4/day	General PA Form			
Welireg <sup>®</sup>	NP	Initial Criteria:  ONE of the following:  Diagnosis of Von Hippel-Lindau (VHL) disease and require therapy for ONE of the following VHL-associated cancers, not requiring immediate surgery:  Renal cell carcinoma (RCC)  Central nervous system (CNS) hemangioblastomas  Pancreatic neuroendocrine tumors (pNET); AND  Diagnosis of advanced renal cell carcinoma (RCC) and patient has tried and failed, contraindication, or intolerance to ALL of the following:  Programmed death receptor-1 (PD-1) or programmed death-ligand 1 (PD-L1) inhibitor (e.g., nivolumab, avelumab, pembrolizumab)  Vascular endothelial growth factor tyrosine kinase inhibitor (VEGF-TKI) (e.g., Cabometyx, Inlyta, Lenvima, Nexavar, Sutent); AND  Prescribed by, or in consultation with, a hematologist or oncologist; AND  Patient is not pregnant or breastfeeding; AND  Females of reproductive potential and males with female partners of reproductive potential should be advised to use effective non-hormonal contraception during treatment and for 1 week after the last dose  Renewal Criteria:  Patient continues to meet initial criteria; AND  Patient does not show evidence of progressive disease and unacceptable toxicity (e.g., anemia, hypoxia)	3/day	General PA Form
